TECHNICAL SKILLS

Microservices Spring Boot
Java Github Copilot Gemini
Claude PostgreSQL Cursor
Mockito JUnit Jmeter
Unit & Integration testing
RabbitMQ Hibernate GIT
ReactJS HTML JavaScript
Oracle H2 AWS Jenkins
Docker Kubernetes UC4
Python Kibana MongoDB
Redis DSA Debugging
Async Programming

EDUCATION

2016 - 2020
Government Engineering College, Bilaspur
Bachelor of Technology
Computer Science and Engineering
CPI : 9.0/10

SOFT SKILLS

Good Learner Leadership
Team Spirit Collaborative

CERTIFICATIONS

AWS Certified Cloud Practitioner
Microservices & Spring Boot L2

EXPERIENCE

Verizon **Engineer-III Consultant**
06/2025 - Present Bangalore, India

- Leveraged AI Models to automate environment setup and test account generation, cutting manual operational overhead by 80%.
- Successfully delivered Perks and ST-5 project, including system error fixes that enhanced customer experience.

Societe Generale **Software Engineer**
04/2022 - 06/2025 Bangalore, India

- Led migration of a monolithic WAR-based application to a modern microservices architecture, reducing deployment time by 70% and improving maintainability.
- Implemented caching mechanisms to optimize data retrieval, resulting in 79% reduction in application runtime.
- Optimized database access using projections and query pagination, achieving 60% faster API responses.
- Implemented database refresh for non-production environments using S3 buckets.

Wipro Limited **Project Engineer**
03/2021 - 04/2022 Chennai, India

- Led the successful migration of Mobile Check Deposit and Automated Investor Payments to a modernised Rails structure.

PROJECTS

Online Retail Store

- Designed and built a **microservices**-based retail store using **Spring Cloud** (Eureka, Hystrix, API Gateway, Config Server) and **Spring Data JPA**, with inter-service communication across **5+ independently deployable services**.

Customer Account Tracker

- Built a **Spring MVC**-based banking application with UI to manage customer accounts and simulate fund transfers, covering **5 core operations** with input validation.

Conversational Question Answering Bot

- Developed an interactive chatbot in **Python** using a BERT-based NLP model achieving **90% accuracy** in resolving college-related queries without human intervention.

ACHIEVEMENTS

- Awarded **Spot Award** by senior leadership for outstanding contribution to the database refresh process.
- Served as **Team Lead** of the Developers Club at GECB.
- Top 400 performers** in a national-level hackathon by Bridgingo.
